

INSIDER TECHNICAL SUPPORT ENGINEER ASSESSMENT

Hello,

First of all, we wish you success.

Task: We expect you to create a sticky pop-up that displays the product information, even when scrolling to the bottom of the website. You can complete this task using jQuery or vanilla JavaScript. Please review the details below.

Details:

- This pop-up should appear when you paste the code you wrote into the browser console while on the product page provided in the link below.
- The pop-up should be placed in the bottom right corner of the website and should remain sticky while scrolling.
- The pop-up must include the following product details:
 - Product Name
 - Price
 - Size
 - Color
 - Quantity
 - "Add to Cart" button
- When the "Add to Cart" button is clicked, the product should be added to the cart as if the actual "Add to Cart" button was clicked on the product page.
- The design is entirely up to your imagination.

Submission: Please submit your code as a single JavaScript file. All necessary HTML and CSS for the pop-up should be generated within the JavaScript file itself.
